# MACHO MAN

Maximizing fertility.

## About Macho Man

Macho Man is a high Omega 3 and 6 Fatty Acid product, which is the building block for Testosterone. Further fortified with the essential trace minerals, vitamins and betacarotene ensures that he is ready to defend against any free radical stress, be it from shipping or heat.

## How to Use

Simply add 0.30 lbs per head per day as a top dress to your existing diet. It takes 55 days for sperm to be produced so we recommend feeding Macho Man for a minimum of 60 days prior to turning rams out with the ewes. For better results, continue feeding throughout breeding. As a loose product, it mixes well with grain if you are hand feeding or adding to a mixer wagon for larger loads.
